GRAVITY EQUAL FORCE
SAPPHIRE DIAL IN GREY

EXPERIENCING THE TRANSPARENCY

A stunning new version of our milestone Gravity Equal Force timepiece available in a limited edition of only 15 pieces. With its off-center grey-toned sapphire dial and dark grey ruthenium coated bridges, the strikingly cool monochrome watch offers an extraordinary view of the exquisitely-finished manufacture movement.

With the transparent sapphire dial, the watch allows a greater view of the movement; as a result, the 3D effect – which is always part of the Armin Strom experience – is even more pronounced.

The Gravity Equal Force, first launched in 2019, is the world's first automatic watch with constant force transmission, which results in consistent power delivery to the balance. In short, it means that the watch always delivers flawlessly constant precision during its 72 hours power reserve.

ARMIN STROM
SWISS WATCH MANUFACTURE

DISTINGUISHED IN EQUAL PART BY ITS TECHNICAL AND AESTHETIC INNOVATIONS

The movement's black plate guilloché pattern was created by hand by the celebrated Finnish watchmaker Kari Voutilainen.

The off-center grey-toned sapphire dial offers an unobstructed view of the fascinating mechanics inside the case and emphasizes the brand's passion for transparent mechanics.

The bridges are coated with dark grey ruthenium; the barrel and the micro rotor are coated with rhodium.

The ASB19 movement includes a "stop work" mechanism that prevents the mainspring from fully unwinding, thus leveraging only the part of the mainspring's unwinding process that can deliver power most consistently.

The steel hands are manufactured by Armin Strom and like all of the visible parts of the movement, are meticulously hand-finished in-house.

SWISS WATCH MANUFACTURE

A STRIKINGLY COOL MONOCHROME WATCH

Presented in a classic 41 mm stainless-steel case, the Armin Strom Gravity Equal Force with Sapphire Dial in grey comes with a black fabric strap with light grey stitching, subtly maintaining the watch's resolutely cool monochrome color scheme.

EXQUISITE IN-HOUSE DESIGN AND PRODUCTION

This breathtaking new Gravity Equal Force timepiece was designed and produced in-house at the brand's manufacture in Biel. Like every Armin Strom watch, its movement has been assembled twice. After its first assembly, the movement was painstakingly disassembled and each individual part was cleaned, dried, reassembled and lubricated before being meticulously regulated, tested, and returned to the case.

TECHNICAL SPECIFICATIONS
