THE GOLDEN ERA: MIRRORED FORCE RESONANCE IN 18K ROSE GOLD

Armin Strom's Iconic Resonance Timepiece Enters a New Era with a Rose Gold Case and Black Guilloché Dial

Armin Strom enriches its Mirrored Force Resonance collection with a refined new edition in **18K rose gold**. For the **first time**, the signature case is crafted from this warm metal, featuring alternating brushed and polished finishing across its 43 mm diameter. Below the sapphire crystal, the large **black** off-centre dial provides a bold contrast. It features a **handcrafted sunray guilloché** pattern created on a traditional rose engine lathe, framed by a chapter ring with circular finishing that adds depth and texture. Paired with a dark grey Alcantara strap, this new interpretation blends mechanical innovation with timeless elegance, marking a golden era for Armin Strom's most iconic timepiece.

RESONANCE, ENGINEERED FOR PERFORMANCE

The manually wound **Caliber ARF21** that powers this timepiece has been hailed as a watchmaking breakthrough in the mastery of resonance. It facilitates the **synchronisation** of two balance wheels via the **patented Resonance Clutch** that connects two sets of oscillators, each with its own balance wheel and hair spring. The mechanism ensures enhanced precision and chronometric stability. A pusher at 2'clock resets the two seconds counters, allowing the wearer to have a visual proof of just how accurate our resonance mechanism is.

EVERY SURFACE HAS SOMETHING TO SAY

At Armin Strom, **hand-finishing** is an essential step towards the creation of our timepieces. Visible through the sapphire crystal on both sides, the movement reveals a refined interplay of **hand-bevelled bridges**, **polished** and **mat finished surfaces** with **black-polished screws**. **Perlage** and **circular graining** further enrich the architecture, each finish thoughtfully applied to underscore Armin Strom's unwavering **commitment to craftsmanship**. Each watch is **assembled twice** to ensure both mechanical precision and finishing integrity.

STATEMENT FROM ARMIN STROM

"The introduction of an **18-karat rose gold case** marks a significant **milestone** for the Mirrored Force Resonance series. This choice of material not only enhances the aesthetic appeal but also **underscores our commitment** to offering a diverse range of options to our clientele. The warm tones of rose gold complement the refined mechanics and craftsmanship of the watch, creating a harmonious blend of tradition and modernity." said Claude Greisler, Co-Founder and Master Watchmaker at Armin Strom.

Mirrored Force Resonance Rose Gold

RG25-RF.90

TECHNICAL SPECIFICATIONS

Case: 18K Rose gold
Sapphire crystal and case back
with anti-reflective treatment

Water resistance: 3 ATM
Diameter: 43 mm
Height: 11.55 mm
Lug-to-Lug: 48.60 mm

Dial: Black, off-center, guilloché, azurage
applied polished baton indexes

Hands: Rose gold coloured, faceted and
polished

Strap: Dark grey Alcantara
strap with grey stitching
18K Rose gold pin buckle

Indications: Hours, minutes, twin-seconds

Winding mechanism: Manual winding

Functions: Resonance, Flyback

Regulating system: Two independent
regulating systems connected
by a resonance clutch

Power reserve: 48 hours

Limited Edition: 15 pieces

CALIBER ARF21

TECHNICAL SPECIFICATIONS

Winding mechanism:

Manual winding

Functions:

Resonance, Flyback

Regulating system:

Two independent regulating systems connected by a resonance clutch

Power reserve:

48 hours

Dimensions:

37.20 mm x 6.70 mm

Frequency:

3.5 Hz (25,200 vibrations per hour)

Jewels:

39

Number of components:

276
